***Announcing real-time marine fuel prices online, ahead of the 2010 Miami Boat Show!
Finally, a centralized resource to shop and compare current fuel prices at marinas, fuel
docks, and wholesalers throughout the United States & Caribbean.***

Stuart, FL, February 4, 2010 - - After 2 years of research, development, and hard work, the dedicated Marinefuel.com Team and it's investors are pleased to announce the first (and only) marine industry portal of it's kind. Providing immediate access to the most accurate marina services information available on the internet today, Marinefuel.com streamlines fuel transactions within the marine industry.

In service to all boaters and fuel providers, a free [Basic Membership](#) opens the [Fuel Dock Prices™](#) & [E-Marina™](#) database, putting comprehensive and centralized information at Member's fingertips. The system also has advanced searching capabilities making it easy for members to locate a merchant based on fuel brand, fuel treatment, facility amenity, and much more.

Using [The Fuel Bid Desk™](#) to arrange purchase of 1000 gallons or more, Members can request, review, and then select a preferred vendor to deliver wholesale priced fuel. The website is designed to generate up to 50% savings on every fuel purchase, and offers a variety of services to meet the diverse needs of the marine industry consumer.

[William N. McKenna](#), President of Marinefuel.com, LLC states: *"By spring time, I anticipate the price of oil will be more than \$90/barrel. This will push retail prices across the Nation to over \$5.00/gallon for marine gasoline and marine diesel fuel. These prices are already showing up in the Bahamas and Caribbean this year, so to combat this economic trend, we've created a tool which easily produces the best ROI in the industry."*

Saving professionals and boating enthusiasts hundreds (or thousands) of dollars with free data access for boaters, and free advertising for marinas, Marinefuel.com is the industry's newest, and best, fuel finding resource.
