

Paskal Marine Zip Fasteners brings a new revolutionary 15 mm zipper for the Sail Boat Industry

In a statement today, Paskal Marine Zip Fasteners has announced that it is now offering a stronger, more solid and more durable 15 mm zip fastener for the sail boat industry.

With sail boats enthusiasts in its mind, Paskal specifically designed the PK 15 zipper to meet the harshest and most extreme marine conditions sail boats personnel can face at sea. Made with extremely solid plastic teeth, a sturdy polyester tape and combined with a rough, non corrosive stainless steel slider, the PK 15 zipper offers an ideal solution for Sail bags / Lazy bags/ Boom sail covers. The PK 15 zipper is fully treated against UV rays. Exceptionally strong, yet smooth and flexible, the PK 15 zipper ensures Sail bags / Lazy bags/ Boom sail covers' zippers won't break, jam or rust while at sea or docking at the marina. A flexible string attached to the slider ensures easy and hassle free operation of the zipper.

The PK 15 zipper is currently available in black and white and at any length requested. Additional colors are available upon special request. The PK 15 zipper is manufactured in Israel by Paskal Marine Zip Fasteners and can be obtained through Paskal Israel, Paskal USA, Paskal Australia, Paskal Hong Kong, , or through Paskal's distributors throughout Europe.
